

WELCOME TO 123 GERM FREE!

Hand washing is a necessary part of personal hygiene and can decrease the rate of spreading germs. It is important to teach young children about the effects of poor hand hygiene as well as the importance of hand washing. We have created this activity pack to encourage hand washing and to motivate children to keep doing this, both in and outside of your home.

In the longer term we would hope this improves standards of hygiene in your home and reduces cases of infections.

WHAT IS 123 GERM FREE?

123 is a series of fun wall displays/activities for your child's school toilets/classroom that are designed to improve children's hand hygiene.

123 Mascots : 1 is Super Soap, 2 is Warrior Water, and 3 is Dynamic Dryer.

By decorating children's toilet spaces and drawing attention to the washing area it motivates them to use it.

Motivational wall stickers also give children a reason to wash their hands. Floor stickers can guide the way to the sinks when they leave the toilets.

Materials and activities for your home help keep the messages fresh and act as constant and engaging reminders.

WHAT YOU WILL FIND

This activity pack is designed to encourage young children to wash their hands by helping them understand why it is important to wash them. There are 6 quick and engaging activities for your children to complete at home!

Each activity has a learning aim/outcome as well as instructions plus a template/guide if required.
