

# DESIGN A SOAP BOTTLE OR SOAP BAR

## WHAT YOUR CHILD WILL LEARN

**Creative** – This activity allows children to design their own Soap Bottle/Bar and Towel. The aim is to get them to think about germs and hand washing by understanding the role of the products used for hand hygiene. By using personification, children are more likely to understand which steps are important and why. This exercise helps children to design their own persuasive messages - what would encourage them to wash their hands?

LET'S  
CREATE!

PERFECT  
FOR  
AGES 6-11

## INSTRUCTIONS

**Duration:** 20 minutes

### What you will need:

- Soap bottle template
- Soap bar template
- Arts and crafts materials

### Method:

Encourage your child to be as imaginative and creative as they can be. However it is important to encourage them to think about the role of germs, soap, water and drying - information on this can be found on the 'Why is hand washing important?' page. Using prompts, you can encourage them to add in features that are associated with those roles, for example bubbles. It is also helpful to emphasise that soap makes germs slippery. Get them to think about what is important to include on a soap bottle. How can they portray the role of soap? For example they could draw germ characters being engulfed in soap. An angry face would suggest that it is bad.

Harder version: they could design a more realistic soap bottle and include messages about why hand washing is important.
