

WELCOME TO 123 GERM FREE!

Hand washing is an important part of personal hygiene and can reduce the rate of spreading germs. It is important to teach young children about the effects of poor hand hygiene as well as the importance of hand washing. We have created this activity pack to encourage hand washing and to motivate children to keep doing this, both in and outside your home.

In the longer term we would hope this improves standards of hygiene in your home and reduces cases of infections.

WHAT IS 123 GERM FREE?

123 germ free is a series of free products designed to remind primary school children to wash their hands. We've designed a set of fun mascots where 1 is Super Soap, 2 is Warrior Water, and 3 is Dynamic Dryer. These mascots run throughout this pack and you can even cut them out and stick them in your bathroom if you like!

Materials and activities for your home help act as a constant and engaging reminder to wash your hands.

WHAT YOU WILL FIND

This activity pack is designed to encourage young children to wash their hands by helping them understand why it is important to wash them. There are 6 quick and engaging activities for your children to complete at home!

Each activity has a learning aim/outcome as well as instructions plus a template/guide if required.

Activities:

- Slippery Slime
